EXPERIENCE

Red Hat, Pune — *Web Developer Intern*

July 20 18- Jan 2019

Working on variety of javascript related technologies such as MEAN stack, graphql and also writing unit tests in Jest.

TENXT Solutions Private Limited, Noida — *Software Engineer*

May 2018 - June 2018

I worked on the user dashboard of the company's product and rewrote the initial parts of the app in angular.

Regional Remote Sensing Centre- West, Jodhpur — *Intern*

June 2017 - July 2017

Worked as web developer intern and created a website using Bhuvan, a map system created by ISRO which shows changes in the Indian landscape over the past years. The project is live at https://hsocietyisro.github.io/.

EDUCATION

Swami Keshvanand Institute of Technology, Jaipur -B. Tech

August 2014 - May 2018

PROJECTS

Read It

Currently I am working on a project that uses newsapi.org api to show the news and also supports voting system on different news articles. https://vyasriday.github.io/read-it

Teleapp

Teleapp is a web app where you can search for different movies and tv shows. The app is deployed on heroku and is live at https://hriday-teleapp.herokuapp.com/.

Pick Color

Pick Color is a simple app that I built to understand the native state mechanism of react.js. Project is live at https://vyasriday.github.io/react-pick-color/
