EXPERIENCE

Red Hat, Pune — *Web Developer Intern*

July 2018- Jan 2019

I was working on the internal web portal of the company as a MEAN stack developer. I worked on the UI of the application as well on writing unit tests for the app.

TENXT Solutions Private Limited, Noida — *Software Engineer*

May 2018 - June 2018

I worked on the user dashboard of the company's product and rewrote some of the parts of the app in angular.

Regional Remote Sensing Centre- West, Jodhpur — *Intern*

June 2017 - July 2017

Worked as a web developer intern and created a website using Bhuvan, a map system created by ISRO. The project is live at https://hsocietyisro.github.io/.

PERSONAL PROJECTS

React Youtube (React.js)

React Youtube is a minimal implementation of youtube in react. The app uses youtube data api. The project is still in progress and can be found at https://vyasriday.github.io/react-youtube/.

React App (React.js, Redux)

React App is a project which I did to implement my react skills and also implemented redux for state management, The project code can be found at https://github.com/vyasriday/react-app.

Watch Next (Vue.js)

Watch Next is a web app that lets you search for different movies and TV shows. It also shows you the latest movies and tv shows. https://watch-next.netlify.com.

Pick Color (React.js)

Pick Color is a simple app that I built to understand the native state mechanism of react.js. Project is live at https://vyasriday.github.io/react-pick-color/.

SKILLS

React.js, Redux, Node.js
